

Citrus Production

Name _____

The citrus production for various areas of the country has been provided to you in the handout Florida's Citrus Productions. This data is assembled by state and national economists and statisticians for a variety of uses. Following your teacher's direction, using your own graph paper, decide how best to depict this information for ease of comprehension by others reading the graphs. You determine the type of graph to use.

1. Graph and compare data from the citrus producing counties of Florida.
2. Graph and compare the most recent data from the citrus producing countries of the world.
3. Graph and compare data from the top 5 citrus producing countries of the world in 2010-2011 to 2007-08 crop years for the various citrus fruits.
4. Graph and compare data from the three types of citrus produced in 2007-08 as compared to the total citrus produced. The graph needs to depict all three types of citrus on one graph.
5. Depict Florida's share of world citrus production in 2007-08 using a graph.
